## Uzasadnienie

W celu uszczegółowienia przebiegu granic obszarów chronionego krajobrazu: „C” (Barlinek) i Pojezierze Drawskie dokonano korekty ich przebiegu. Granice obszarów uszczegółowiono na podstawie aktualnych danych z ewidencji gruntów i budynków prowadzonej w skali 1:5000, udostępnionych przez właściwe miejscowo Powiatowe Ośrodki Dokumentacji Geodezyjnej i Kartograficznej.

Dotychczasowy przebieg granic ww. obszarów chronionego krajobrazu wyznaczony był na podstawie map topograficznych. W pewnych odcinkach granice przedmiotowych obszarów chronionego krajobrazu przecinały działki ewidencyjne. Do obszarów włączono w całości te działki ewidencyjne, których większa część powierzchni należała do ochk oraz działki ewidencyjne, które częściowo należały do ochk i jednocześnie na podstawie danych „Waloryzacji Przyrodniczej Województwa Zachodniopomorskiego” (Biuro Konserwacji Przyrody w Szczecinie, luty 2010r.) stwierdzono, że zinwentaryzowano na ich terenie siedliska przyrodnicze. W toku prac opierano się na opisach granic ww. obszarów zawartych w aktach powołujących oraz pomocniczo korzystano z warstw wektorowych przebiegu granic opracowanych na potrzeby „Waloryzacji Przyrodniczej Województwa Zachodniopomorskiego”. Ponadto wykorzystano dane wektorowe udostępnione z zasobu Wojewódzkiego Ośrodka Dokumentacji Geodezyjnej i Kartograficznej w Szczecinie.

W przypadku ochk „C” (Barlinek) dokonano nieznacznej korekty przebiegu granicy na terenie gminy Pełczyce (w miejscowościach Będargowo, Płotno, Jagów). Na działkach pozostawionych poza obszarem nie stwierdzono, osobliwości przyrodniczych, zinwentaryzowanych siedlisk lub obiektów proponowanych do objęcia ochroną prawną, gdyż są to głównie tereny zabudowy mieszkalnej, zabudowy po gospodarstwach PGR oraz przylegające do nich niewielkie powierzchnie pól uprawnych, nieużytków lub przydomowych ogródków.

Obszar chronionego krajobrazu Pojezierze Drawskie został powiększony o część jeziora Pile wraz z przylegającymi do niego działkami zarządzanymi przez Państwowe Gospodarstwo Leśne Lasy Państwowe Nadleśnictwo Szczecinek i Borne Sulinowo. Tereny te, zgodnie z treścią aktu powołującego tj. załącznika nr 2 Uchwały nr X/46/75 Wojewódzkiej Rady Narodowej w Koszalinie z dnia 17 listopada 1975 r. w sprawie obszarów chronionego krajobrazu (Dz. Urz. W. .R .N. w Koszalinie nr 9, poz .49 ze zm.) pozostawały poza obszarem. W trakcie prac związanych z korektą przebiegu granicy przedmiotowego ochk, stwierdzono, iż stanowią one obszary cenne przyrodniczo, m.in. ze względu na zinwentaryzowane siedliska przyrodnicze. Włączenie przedmiotowych terenów częściowo uwzględniło również propozycję, zawartą w Waloryzacji Przyrodniczej Gminy Borne Sulinowo (Biuro Konserwacji Przyrody w Szczecinie, 2002 r.), dotyczącą powiększenia przedmiotowego ochk.

Z terenu ochk Pojezierze Drawskie wyłączono natomiast część działek zlokalizowanych w obrębie geodezyjnym Parsęcko w gminie Szczecinek, na podstawie opracowania z września 2012r „Walory przyrodnicze i krajobrazowe północno-wschodniej części Obszaru Chronionego Krajobrazu „Pojezierze Drawskie” w miejscowości Parsęcko między Szosą Szczecinek-Barwice a eksploatowanymi torfowiskami „Bagno Wielkie” na północny zachód od Mosiny”. Z cytowanego powyżej opracowania wynika, iż przedmiotowy teren ma niską wartość krajobrazową (typowy lekko falisty krajobraz rolniczy – popegeerowski) z działalnością przetwórstwa kopalin (torfu) dowożonego z terenu leśnego (...). Dawne ekstensywne łąki kośne w części południowej zamieniły się w nieużytki przechodzące w drodze sukcesji w łozowiska - a więc straciły swój pierwotny walor krajobrazowy i przyrodniczy jaki miały przy tworzeniu w 1975 roku OChK. Wartość przyrodnicza terenu jest równie niewielka. Ponadto utrzymywanie w granicach OChK terenów o niskiej wartości, które jednocześnie leżą na obrzeżu zmniejsza walory całego obszaru i jednocześnie komplikuje działalność gospodarczą.

Z przedmiotowego ochk wyłączono także dz. nr 1/1 i 1/2 obręb geodezyjny Kucharowo gmina Borne Sulinowo, na których, w ramach udzielonych pozwoleń i koncesji, od 1977 roku prowadzona jest eksploatacja złoża torfu „Mosina”. Stan terenu złoża, ze względu na prowadzoną działalność górnictwem nie przedstawia wyróżniających się walorów krajobrazowych, wartościowych ze względu na możliwość zaspokajania potrzeb związanych z turystyką i wypoczynkiem.

W konsekwencji opisanej korekty przebiegu granic obszarów chronionego krajobrazu „C” (Barlinek) i Pojezierze Drawskie, poprowadzeniu ich zgodnie z danymi ewidencji gruntów, a także ze względu na zastosowanie innych technik obliczeniowych, zmianie uległy powierzchnie poszczególnych obszarów chronionego krajobrazu, a co się z tym wiąże także łączna powierzchnia tych form ochrony przyrody na terenie województwa zachodniopomorskiego, co znajduje odzwierciedlenie w treści przedmiotowej uchwały.
